

## II. Amendments to the Claims

Please amend Claims 7, 15, 24, and 31, as follows:

SubD17  
Claims 1-6 (Cancelled)

7. (Currently Amended) A method for providing a quantity of pre-paid telephone time from a POS terminal in communication with an electronic clearing house, to patrons of said POS terminal, comprising in combination:

- OK
- a) ordering a pre-determined amount of telephone time from a plurality of telephone service providers, and further obtaining from each telephone service provider a plurality of groups of second PIN numbers, each of said second PIN numbers when provided to a patron of such POS terminal during a transaction and subsequently supplied by the patron to the telephone service provider adapted to allow telephone service for said patron for a pre-determined quantity of time, each of said second PIN numbers having associated therewith a pre-determined quantity of time

for which telephone service will be enabled, said pre-determined quantity of time associated with second PIN numbers within one group of said plurality of groups being different from the pre-determined quantity of time associated with second PIN numbers within another of said groups of unique second PIN numbers;

- at Cont*
- b) querying a patron of such POS terminal, who accesses the POS terminal by providing the POS terminal with an encoded card and a first PIN number, as to whether the patron wishes to purchase telephone time;
  - c) in response to a positive reply to the aforesaid query, providing the patron with a plurality of telephone service providers to select from;
  - d) providing to the patron a plurality of pre-defined quantities of telephone times which may be purchased, and requesting the patron select a particular pre-defined quantity of telephone time;

- AD  
cont
- e) in response to input from said patron as to the quantity of time selected, querying said patron as to whether the patron desires to charge the patron's credit card or debit the patron's bank account;
  - f) in the event that the patron desires to charge the patron's bank account, verifying that the patron has sufficient funds to purchase said quantity of telephone time, and debiting such account;
  - g) in the event the patron desires to charge the patron's credit card, verifying that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card;
  - h) upon satisfaction of f) or g) above, selecting a second PIN number from a selected group of said plurality of groups of second PIN numbers during the transaction, said selected group corresponding to a group of second PIN numbers associated with said selected telephone service provider and said selected quantity of telephone service time; and

i) providing said selected second PIN number to such patron.

8. (Original) The method as claimed in claim 7, said step of providing said second PIN number to such patron comprising printing said selected second PIN number on the POS terminal's existing account statement printer, and thereafter providing it to said patron.

9. (Original) The method as claimed in claim 8, said step of verifying that the patron has sufficient funds to purchase said quantity of telephone time comprising verifying sufficiency of such funds through an electronic clearing house communicating with said POS terminal.

10. (Original) The method as claimed in claim 9, said step of verifying that the quantity of time desired to be purchased may be charged to said credit card comprising verifying through said electronic clearing house communicating with said POS terminal.

Claims 11-14 (Cancelled)

15. (Currently Amended) A method for providing a fixed quantity of pre-paid telephone time from a device comprising a conventional automated teller machine (ATM) or a point-of sale (POS) terminal, having a display screen and printing capability and a pre-existing communication capability with an existing computer system operated by a financial institution ~~such as a bank~~, to a patron of said device who accesses said device through provision to said device of an encoded card and first personal identification number (PIN), without hardware modifications to said device, hardware additions to said existing system, or additional communication links to a telephone service provider, comprising the steps of:

- a) making available to said device a plurality of pre-assigned second PIN numbers, each of said second PIN numbers adapted, when provided by said patron during a telephone call to a telephone service provider, to allow telephone service for the patron for a period of time up to said quantity of pre-paid time, the plurality of second PIN numbers being grouped into a

plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased;

- At Cont  
DI
- b) querying said patron of said device as to whether the patron wishes to purchase telephone time;
  - c) verifying that the patron has sufficient funds to purchase said quantity of telephone time, and charging such funds for said quantity of time;
  - d) upon satisfaction of c) above, selecting one of said plurality of second PIN numbers from one of said groups of second PIN numbers; and,
  - e) printing said selected second PIN number and providing it to such patron via an account statement printer used in association with said device, ~~without contacting the telephone service provider,~~ without contacting the telephone service provider.

16. (Previously Added) The method as claimed in claim 15, wherein said funds comprise funds held by said patron in a bank account.

17. (Previously Added) The method as claimed in claim 15, wherein said funds comprise funds which may be advanced by charging a credit card.

18. (Previously Added) The method as claimed in claim 15, further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has sufficient funds to purchase said quantity of telephone time, and charging said bank account for said quantity of time, and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that

the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card for said quantity of time.

19. (Previously Added) The method for providing a fixed quantity of pre-paid telephone time from a device as claimed in claim 15, said step of making said second PIN numbers available to said device comprising storing said second PIN numbers on a database which is capable of being accessed by said device.

20. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 19, said plurality of second PIN numbers comprising a plurality of groups of second PIN numbers, each second PIN number in a respective group of said groups of second PIN numbers permitting telephone service for a pre-determined quantity of time, each second PIN number within a respective group providing a different quantity of pre-paid telephone time than second PIN numbers within another group, further comprising the steps of:

querying said patron in step b) as to what quantity of a number of predefined quantities of telephone time such patron wishes to purchase; and

in response to input from said patron as to the particular quantity of telephone time desired to be purchased, selecting a second PIN number from a respective group of second PIN numbers which provides telephone time corresponding to the particular quantity of pre-defined quantities of telephone time selected by said patron.

21. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 20, wherein said plurality of second PIN numbers are ordered from and provided by said telephone service provider.

22. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 21;

said step of ordering a plurality of PIN numbers from said telephone service provider comprising ordering a number of groups of second PIN numbers, the number of groups of second PIN numbers being equal to said number of pre-defined quantities of telephone time.

DI  
CK  
23. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 22, further comprising, after or at the same time as step a), querying the patron of said device as to whether the patron wishes to purchase telephone time from a selected list of telephone service providers.

24. (Currently Amended) A method for providing a quantity of pre-paid telephone time from a device comprising a conventional point-of sale (POS) terminal or automated teller machine (ATM) which is operatively connected to an existing computer system operated by a financial institution ~~such as a bank~~, to a patron of said device, without hardware modifications to said device, hardware additions to said existing system, or

additional communication links to a telephone service provider, comprising the steps of:

- DI  
Cont
- a) ordering a pre-determined amount of telephone time from a plurality of telephone service providers, and further obtaining from each telephone service provider a plurality of groups of second PIN numbers, each of said second PIN numbers adapted, when provided to a patron of such device and subsequently supplied by the patron to the telephone service provider, to allow telephone service for said patron for a pre-determined quantity of time, each of said second PIN numbers having associated therewith a predetermined quantity of time for which telephone service will be enabled, the plurality of second PIN numbers being grouped into a plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased ~~said pre-determined quantity of time associated with second PIN numbers with in one group of said plurality of groups being different from the pre-determined quantity of~~

~~time associated with second PIN numbers within another  
of said groups of unique second PIN numbers;~~

- DL  
Cont
- b) querying a patron of such device, who accesses the device by providing the device with an encoded card and a first PIN number, as to whether the patron wishes to purchase telephone time;
  - c) in response to a positive reply to the aforesaid query, providing the patron with a plurality of telephone service providers to select from;
  - d) providing to the patron a plurality of pre-defined quantities of telephone times which may be purchased, and requesting the patron select a particular pre-defined quantity of telephone time;
  - e) verifying that the patron has sufficient funds to purchase said quantity of telephone time, and debiting such funds,

DL  
Cont

f) upon satisfaction of e) above, selecting a second PIN number from a selected group of said plurality of groups of second PIN numbers, said selected group corresponding to a group of second PIN numbers associated with said selected telephone service provider and said selected quantity of telephone service time, and

g) providing said selected second PIN number to such patron, without contacting the telephone service provider.

25. (Previously Added) The method as claimed in claim 24, wherein said funds constitute funds held by said patron in a bank account.

26. (Previously Added) The method as claimed in claim 24, wherein said funds constitute funds which may be advanced by charging a credit card.

27. (Previously Added) The method as claimed in claim 24, further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has sufficient funds to purchase said quantity of telephone time, and charging said bank account for said quantity of time, and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card for said quantity of time.

28. (Previously Added) The method as claimed in claim 24, said step of providing said second PIN number to such patron comprising printing said selected second PIN number on said device's existing account statement printer, and thereafter providing it to said patron.

29. (Previously Added) The method as claimed in claim 28, said step of verifying that the patron has sufficient funds to purchase said quantity of telephone time comprising verifying sufficiency of such funds through said electronic clearing house communicating with said device.

30. (Previously Added) The method as claimed in claim 29, said step of verifying that the quantity of time desired to be purchased may be charged to said credit card comprising verifying through said electronic clearing house communicating with said device.

31. (Currently Amended) A method for crediting, via a device comprising a conventional POS terminal or an ATM, having pre-existing communication capability with an existing computer system operated by a financial institution ~~such as a bank~~, a quantity of predetermined telephone time to a patron who possesses a wireless telephone having a pre-assigned telephone number, which permits said patron, after the initial provision by said patron of a second personal identification number (PIN) to a telephone service provider, to thereafter utilize said

telephone for a period up to said quantity of pre-determined quantity of telephone time without having at the time of each subsequent telephone call to provide said telephone service provider with said second PIN number prior to being permitted to make said telephone call, without hardware modifications to said device, hardware additions to said existing system, or additional communication links to a telephone service provider, which comprises in combination:

- 
- a) querying a patron of said device, who accesses said terminal through provision to the terminal of an encoded card and a first personal identification number (PIN), as to whether the patron wishes to purchase telephone time and what quantity of telephone time,
  - b) querying said patron as to said quantity of time desired to be purchased,
  - c) verifying that the patron has sufficient funds to purchase said desired quantity of telephone time;
  - d) debiting such funds;

e) selecting said second PIN number from a plurality of second PIN numbers, each of said second PIN numbers adapted, when supplied by said patron during a telephone call to a telephone service provider, to allow telephone service for the patron for a period of time up to said quantity of purchased time, the plurality of second PIN numbers being grouped into a plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased;

f) providing said selected second PIN number to such patron, without contacting the telephone service provider;

g) receiving said second PIN number from said patron;

h) correlating the pre-assigned telephone number of said wireless telephone with a corresponding account held by said telephone service provider in respect of said patron; and

- i) crediting said account with said quantity of pre-determined telephone time purchased by said patron as ascertained from said second PIN number.

32. (Previously Added) The method as claimed in claim 31, wherein such funds constitute funds held by said patron in a bank account.

33. (Previously Added) The method as claimed in claim 31, wherein said funds constitute funds which may be advanced by charging a credit card.

34. (Previously Added) The method as claimed in claim 31, further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has sufficient funds to purchase said

quantity of telephone time, and charging said bank account for said quantity of time; and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card for said quantity of time.

35. (Previously Added) The method as claimed in claim 31, said step of providing said selected PIN number to said patron comprising printing said selected second PIN number on said device's existing account statement printer and thereafter providing it to said patron.

36. (Previously Added) The method as claimed in claim 31, wherein

said wireless telephone possesses a specific frequency and identification code;

said second PIN number is received from said patron by way of a telephone call from said patron on said wireless telephone; and

said pre-assigned telephone number is correlated to said account of said patron when said telephone call is received from said patron.

37. (Previously Added) The method as claimed in claim 36, said telephone number of said wireless telephone ascertained by said telephone service provider at the time said patron communicates said second PIN number to said service provider, said service provider thereafter matching said telephone number with said account and subsequently crediting said account with said predetermined quantity of telephone time.
